

# Jacksons Fencing Specification Sheet

## Jakwall

Jakwall is a highly unusual grooved, brick effect landscape timber system. It comes in three options; one with a 90mm grooved face towards the front. This option is ideal for creating retaining walls or raised flower beds.

Another option is to have the 140mm grooved face to the front. This larger "brick" effect front is more suitable for creating a wall or fence by building single timbers up on top of each other to create any height wall/fence that you require.

A further option is to have the timbers grooved all round, so every face shows the brick effect grooves.

The timbers are fixed together with a timberlock system without any need for pre-drilling, available in two lengths.

A Hex Head bit for use with power tools is also available.

- All timber used throughout is superior quality Jakcured softwood guaranteed for 25 years
- Retaining wall ideal for raised borders, fish ponds, play areas, sand pits and fascia borders
- Easy installation
- Works out considerably cheaper when compared with bricks and mortar

## Specification

Jakwall planed all round and Jakcured

2.35m x 140mm x 90mm grooved on 90mm face

2.35m x 140mm x 90mm grooved on 140mm face

2.35m x 140mm x 90mm grooved all round

### Fixings (3 fixings per 2.3m)

150mm fixing timber screw for hex head

200mm fixing timber screw for hex head

Hex bit for 5/16" for timber screw

Retaining wall and Raised beds created using 140mm grooved face Jakwall

Raised bed created using 90mm grooved face Jakwall

Wall/fence made from 140mm grooved face Jakwall

Timber Lock fixings
