

Slotted Jakposts & Square Posts

Our slotted Jakposts are designed to work with all our fencing panels from Jaktop and Palisade to Featherboard, Venetian and even our Trellis. The only exception is our Metro Panels which only work with square posts.

Jakposts are 95mm x 98mm, planed finish with two 54mm x 25mm slots for panels. All panels slot easily into position as shown here.

Close up of Intermediate post

We have listed below some of the many benefits to using Jakposts:

- All timber is Jakcure® treated softwood guaranteed for 25 years.
- Environmentally friendly.
- Jakposts reduce damage caused by wind movement when panels are screwed to posts.
- Unlike concrete posts, there is no risk of frost damage, cracks or chips.
- Easy to carry and lighter than concrete posts.
- Easier to erect than concrete posts.
- More supportive than square section posts & avoids gaps between panels & posts.
- Gravel boards, capping and finials available.
- Stainless steel nails used throughout.
- More natural appearance than concrete posts.

We generally recommend that all posts should be set in concrete at a minimum 0.60m into the ground. Please ask for advice when sizing gate posts.

Square Section Panel Posts

Planed finish (not slotted). These are standard square section posts without the unique slot that our superior slotted Jakposts have. It is advisable to fix panels to posts with Jakclips when using standard posts. See page 153.

Recommended Fixings

We recommend using 6 screws per panel or 12 per panel if using capping rails plus an additional 4 per gravel board. 60mm, stainless steel, self-drilling countersunk screws are available in packs of 100 or 200 to secure panels to posts. Panels should be screwed to the posts to secure the fence run.

Installation instructions for most of our products are available from our website: www.jacksons-fencing.co.uk. Alternatively, we can supply you with a copy on request.

Gravel Boards

Gravel boards are important in ensuring your fencing stays in good quality condition. Our gravel boards are made from a specific type of timber, which is different to the timber we use for our fencing and is Jakcure® treated specifically for constant ground contact and is integral to ensure we can guarantee our fencing for 25 years.

Gravel boards are also used to raise panels off the ground, give a fence extra height and add a finishing touch to a well put together run of fencing. All timber used throughout is premium quality Jakcure® treated softwood, guaranteed for 25 years.

Jacksons Supply Two Types of Standard Gravel Board:

The first is a gravel board for use with our slotted Jakposts. This version includes two spacer blocks that prevent the gravel board from movement when installed in the slotted posts. The spacer blocks can be purchased separately if spares are required (667601). We recommend gravel boards are screwed into position to prevent any movement.

The second gravel board type we offer is a 2.40m long x 140mm x 25mm (230700) typically used with Traditional Fencing such as Traditional Featherboard. This version will not work with our slotted Jakpost system.

When using two gravel boards to increase the height of a fence, the boards should be held together with a 600mm x 50mm x 50mm (644400) support post to prevent any distortion. This should be placed centrally and driven into the ground with the gravel boards screwed to it. Gravel boards are not intended to retain earth on one side of the fence without additional support.

To meet the conditions of the 25-year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground and any timber cut on site must be treated with Jakcure® Cut Treatment, see page 53.

Gravel Boards	Ref	Price
For use with slotted Jakpost - 1.83m long. 140mm x 28mm with 22mm packers	667600 ●	£9.10
Not for use with slotted Jakpost - 2.40m long. 140mm x 25mm	230700 ●	£9.20

Please note: for our Metro gravel boards see page 29.

Hedgehog Friendly Gravel Boards

In response to learning about the decline in hedgehog numbers in the UK - it has been estimated that the current population is down by half since 2000 according to a report published in The Guardian (2018) - Jacksons introduced a hedgehog friendly gravel board for use with Slotted Jakposts (shown above). We have been delighted with the response from the public and wildlife organisations to our raising awareness of this problem and offering a simple solution that allows hedgehogs to roam freely between gardens.

We offer a hedgehog friendly gravel board for use with Jakposts (667610) with a hole at one end, large enough to allow hedgehogs free passage and a reinforcing strip along the top of the board to ensure strength is retained. For more info about the plight of the Hedgehog, visit our website and search for 'Help the Hedgehogs'.

Hedgehog Gravel Boards	Ref	Price
For use with slotted Jakpost - 1.83m long. 140mm x 28mm with 22mm packers	667610 ●	£13.50

For a hedgehog friendly version of the Traditional Fencing (non-panel) gravel board, we suggest customers cut the gravel board on site and by using a small peg to support the fence rail, as shown in the photo. The support pegs are also used to prevent gravel boards distorting when more than one is used to increase fence height.

Support Peg	Ref	Price
600mm x 50mm x 50mm	644400 ●	£1.20

Capping Rails Finials & Post Caps

Post Caps, Finials and Capping Rails all add the final touches to a well put together run of fencing.

Some people may think a post without a Cap or Finial looks unfinished, you can judge this for yourself, the top photo on the right shows Ball Finials on the posts, which punctuate the curves of the Trellis Topper panels.

The photo above shows a single Featherboard panel which has been finished with a capping rail, running flush with the post and panel tops to give a crisp, contemporary look.

We offer a selection of Post Caps, Finials and Capping Rails, all manufactured from superior quality Jakcure® treated softwood, and all guaranteed for 25 years.

Standard Capping for Panels Planed timber with 2 rounded edges

	Ref	Price
1.88m x 120mm x 20mm	667700 ●	£5.40
2.00m x 120mm x 20mm (for use at ends & corners)	667772 ●	£5.40

Heavy Duty Capping Rail

	Ref	Price
For intermediate slotted posts 1.900m x 145mm x 35mm	667700H ■	£9.80
For end and corner slotted posts 1.985m x 145mm x 35mm	667770H ■	£9.80

Capping for Panels Weathered Two Ways

Sawn timber triangular shaped top capping rail. Intended or use between square posts above Featherboard panels. If using between slotted posts, the capping will need to be notched on site.

Note: If you prefer capping to run over the tops of the posts then please use our standard panel capping.

Note: This capping should not be used if you want a totally flat finish where the tops of the post finish in line with the top of the panel.

	Ref	Price
1.83m x 65mm x 35mm	667777 ●	£4.35

Jakcure® Cut Treatment

Where cutting or drilling treated timber cannot be avoided, always use Jakcure® Cut Treatment to ensure no timber is left untreated and the conditions of the 25-year Jakcure® guarantee are met. Read the instructions carefully.
