

Landscape Timbers, Jakwall® & Sleepers

Jakwall is a distinctive grooved, brick effect landscape timber system, unique to Jacksons Fencing.

Ungrooved

Grooved 140mm

It can be used to create retaining walls and is perfect for raised borders, fish ponds, play areas, sand pits or fascia borders.

Sleepers

Jakwall® has four options: 1. 90mm grooved face towards the front, ideal for creating retaining walls or raised flower beds. 2. Grooved all round, so every face shows the brick effect grooves. 3. 140mm grooved face to the front, this larger 'brick' effect front is more suitable for creating a timber wall or barrier. 4. No grooves but with smooth edges.

Installing Jakwall® can work out considerably cheaper than traditional bricks and mortar. It has a simple and easy installation method using timber screws that fix the timbers together without the need for pre-drilling. Always use Jakcure® End Grain Treatment on cut timber - page 53.

Ungrooved or plain Jakwall® was introduced in response to requests from landscape gardeners who loved the Jakwall landscape timber system but preferred a simpler effect.

Decking & Balustrade

As more of us are spending our leisure time outdoors, where better to enjoy an informal meal with friends and family than on the deck? It is the perfect solution for sloping sites or terracing, and it's a great way of joining the house to the garden.

All Jacksons' decking boards are grooved to aid slip resistance and made from premium quality Jakcure® treated softwood, guaranteed for 25 years. There are three board types available - Standard or Heavy Duty and slip resistant Heavy Duty.

To see our latest prices, view our Decking & Balustrade on our website by scanning the QR code

Decks are constructed with spaces between boards to aid drainage and to allow for the natural expansion and shrinkage of the timber, while all fixings and fastenings are non-rusting to ensure an extra-long life.

Detail of decking board profile showing the grooves on top surface and the stress relief cuts on the bottom surface of boards to help avoid warping as boards expand and contract with the weather conditions.

Ordered my decking online very easily. Especially good and invaluable was the use of the decking calculator. Jacksons kept in touch regarding delivery and delivered on time on the appointed day. Even had a forklift truck and placed the pallets exactly where I wanted. Great decking materials to boot. Would recommend if you want good quality decking

Steve, October 2019.

Specification: 3.6m long boards and planed from 150 x 32mm section boards to give a nominal finished size of 143mm x 28mm. Slip resistant boards.

Balustrade Style 1

Balustrade Style 2

All timber decking is likely to become slippery when wet or in situations where standing water is present. While our decking boards feature deep grooves to disperse water, you should exercise caution when the surface is wet. Periodic cleaning to remove moss and lichen will reduce the risk of slipping. Alternatively, slip resistant decking boards are an option. Be aware that during the natural weathering process boards can occasionally splinter slightly so we recommend not to walk on the deck without footwear.

Slip Resistant Decking Boards

Slip-resistant boards are made from premium quality Jakcure® treated softwood and guaranteed for 25 years. They feature grooves and two additional non-slip grit strips per board, which means when the boards get wet, the grit sections provide added grip. Please be aware that the grit strip does sit slightly above the level of the decking to allow for extra grip, so if someone was to fall on these boards there could be a risk of grazing.

Steps up to a hot tub constructed from decking boards plus stringer underneath.

Balustrade

Balustrade is available in two styles and is supplied pre-assembled, in a natural Jakcure® treated finish (unpainted).

Style 1: Pre-assembled garden balustrade panel system that gives a nominal finished height of 1.10m, and 1.83m wide. The nominal vertical 75mm x 20mm pales are set at 100mm apart; fitted with 2 pairs of 75mm x 20mm horizontal rails which fit each side of the pales and fixed into position with timber dowels. These panels, as well as being stylish, are ideal for going up slopes, as they rake to suit virtually any angle of incline.

Style 2: This system features pre-assembled panels with turned vertical 40mm x 40mm spindles set at 100mm apart; fitted between 2 horizontal 70mm x 51mm rails planed.

All systems are fitted in Jakposts, either 1.06m high for normal balustrade, or 2.10m if a pergola is to be installed above the deck. The posts are fitted into 100mm x 100mm galvanised and polyester powder coated black shoes (756000) for inter posts and (756010) for end/corner posts onto a base board which is bolted through the deck. In addition, a capping rail (756800) 3.90m long x 120mm x 20mm is available and should always be used on Style 1 system, and is optional for Style 2 system.

Timber Spur Post
To add extra strength to your balustrade, spur posts & packers can be used. They are supplied in 1.50m x 91mm x 91mm and are drilled for 10mm studding. Spur posts should be fitted to every other post.

Jak-Deck Kits

Here is a quick and easy way to create a deck wherever you want one. Jak-Deck kits are available in three sizes: 1.80m x 1.80m, 1.80m x 3.60m and 3.60m x 3.60m.

Jak-Decks can be assembled easily and used on their own or joined together to create a configuration that suits your project.

All our decking boards are Jakcure® treated, which means they are protected from rot and insect attack for 25 years. Another benefit is our boards are grooved, reducing the risk of slipping.

Please note: Jak-Decks must be fully supported on padstones, compacted gravel or some other firm well-draining surface. All timber decking is likely to become slippery when wet or in situations where standing water is present. You should exercise caution when the surface is wet. Periodic cleaning to remove moss and lichen will reduce the risk of slipping, or alternatively consider slip resistant boards.

Jakcure® Cut Treatment

Where cutting or drilling after treatment cannot be avoided use Jakcure® Cut Treatment to ensure no timber is left untreated. 500g bottle.

Fencing

Use our bespoke fence builder to calculate the quantity & cost of individual components you need to build your new fence.

Our Fence Builder is a handy application designed with you in mind. The calculator prices each panel, post and any necessary extras to provide an accurate estimate for the total price of your fencing project.

Visit: www.jacksons-fencing.co.uk/fence-builder

Decking

Calculate the cost of your decking using our calculator

Decking is an ideal landscaping tool and garden staple used by garden designers, landscape architects and garden enthusiasts. We have developed our handy decking and specifier calculator to make the buying process simpler through estimating how much decking you'll need combined with the overall cost.

Venetian Retreat

Designed using our popular handcrafted Venetian panels for the sides and roof, the Venetian Retreat Shelter is a unique garden structure that will create a delightful 'retreat' in any garden.

The Venetian panels give the shelter an attractive contemporary design and when the sun is shining, cast dramatic patterns of light and shade.

The standard Retreat is a single unit version, as shown above. If desired, an extra panel can be added at the open side. Wider versions of the Retreat can be achieved by adding a third bay (one extra panel).

The Retreat is available with or without a polycarbonate roof covering. The polycarbonate panel sits on top of the Venetian roof panels with the rear edges protruding over the rear fascia to allow rain water to run off, and the polycarbonate box section channels running in line with the pales, across the roof. (Please note if you select the polycarbonate roof option the roof sheet may be delivered separately from the main timber delivery and can only be delivered in mainland UK).

Specifications: Constructed from Jakcure® treated softwood. Retreat is approximately 2100mm high at the front, 2000mm high at the back.

1676mm from front post to rear post, (1923mm including roof overhang). 3325mm wide. We advise always digging the posts 600mm in the ground.

Instructions for installation of most of our products are available from our website. Alternatively we can send you a hard copy. Please enquire with our sales team.

Woven Retreat

Designed using Jacksons' popular Woven panels for the sides and roof. The Woven Retreat Garden Shelter is a unique garden structure that will create a delightful 'retreat' in any garden.

The Woven Retreat shown here is the standard single unit version. If desired an extra panel can be added at the open side (extra panel not included). The Woven Retreat shelter is available with or without a polycarbonate roof sheeting.

Jacksons came recommended by the contractor carrying out some landscaping/gardening work and we have been more than happy with the purchasing process and the resulting finish of the product now that it's in place.

Brian McShane, March 2019.

The polycarbonate panel sits on top of the Woven roof panels with the rear edges, protruding over the rear fascia to allow rain water to run off and with the polycarbonate box section channels running in line with the pales, across the roof. (Please note if you select the polycarbonate roof option the roof sheet may be delivered separately from the main timber delivery and can only be delivered in the mainland UK).

Specifications: The shelter is constructed from Jakcure® treated softwood, planed all round and guaranteed for 25 years. Fixings are stainless steel or hot dip galvanised. It is 2100mm high at the front and 2000mm high at the back. 1676mm from front post to rear post, (1923mm including roof overhang) 3325mm wide. We advise always digging the posts 600mm in the ground.

Wheelie Bin Stores

The Bin Store is made from Jakcure® treated softwood Tongue and Groove Effect boards and has an internal galvanised steel frame for extra strength.

Cabin hooks optional extra

It is designed for two wheelie bins, with hinged doors at the front and hinged lids which open upwards to allow access to the bins. Each lid has a chain which can be attached to the wheelie bin, so as the store lid is lifted it automatically raises the bin lid as well.

To view our latest pricing scan this QR

An additional optional cabin hook is available to attach to the bin store and lid to hold the lid in a secure open position. All timber used throughout is superior quality Jakcure® treated softwood, planed all round and guaranteed for 25 years. Fixings are stainless steel or hot dip galvanised.

Double Bin Store Dimensions

Outside: 1200mm (h) x 950mm (d) x 1500mm (w)

Inside: 1120mm (h) x 800mm (d) x 1350mm (w)

Bin Store with Additional Unit Dimensions:

Outside: 1200mm (h) x 950mm (d) x 750mm (w)

Inside: 1120mm (h) x 800mm (d) x 675mm (w)

Instructions for installation of our products are available. Alternatively we can send you a hard copy. Please enquire with our sales team.

Specifications: Our Bin Store comes as flat packed panels that require self-assembly, instructions and fixings are included.

Please note: Wheelie bins can vary in size - please measure your bin to ensure it will fit in the store. You can only use the shelf in an additional unit, not the main double store.

We reserve the right to alter specifications accordance with our policy of continuous improvement.

■ Check for availability ○ Made to order (cannot be cancelled once ordered)

I'd been looking for a wheelie bin store for a while. I wanted one that looks nice and will last. I wasn't disappointed..excellent quality, clear Instructions and easy to put it together I'd definitely recommend.

Lyn Edwards, June 2020.

Shelf unit will not work in the double store and will only work with the additional unit.

Sissinghurst Planters

These beautifully designed planters will add a touch of class to any corner of your garden.

Available in two sizes, the planters are produced from strong 25mm x 120mm heavy duty planed tongue and groove boards made from Jakcure® treated softwood timber. (100mm visible).

Fantastic product. Best I could find.
Professional, brilliant communication and delivery.
Second time we've used them.
Absolutely superb service!
M.S., February 2019.

The 'L' formation corners are produced from 95mm x 22mm boards and the base consists of 95mm x 22mm slats with small drainage gaps with a planed finish. These sit approximately 80mm off the ground, on 38mm x 19mm battens.

Jacksons Fencing products and planters are renowned for their quality and sturdiness, this does mean that these planters are rather heavy, especially when they are filled, so you may require assistance when moving and we recommend they are moved into position whilst empty. The planters are delivered already assembled.

All timber used throughout is superior quality Jakcure® treated softwood, planed all round and guaranteed for 25 years. Fixings are stainless steel or hot dip galvanised.

Specifications: The internal dimensions of the planters are 440mm x 440mm for the smaller square planters (753200) and 440mm x 900mm for the larger long planter (753201). Both styles of wooden planter have a depth of 380mm internally.
