

Featherboard Panels

One of the strongest types of fencing available, Featherboard fence panels have a traditional Closeboard or Featheredge design, improved by the use of Jakcure® pressure treated timber, and stainless steel fixings. These versatile panels are a timeless feature in any garden. Our Featherboard fencing also comes in kit-form, see pages 44 - 45.

Panels shown with optional capping rails

Non-standard gate. Top rail + bottom flush. Normally set 125mm down/up

Our Featherboard panels are built with two rails on the 0.6m and 0.9m sizes, and three rails on all heights above 0.9m for added strength and stability. Each panel is clad with 100mm pales to provide one of the strongest closeboard panel fences available. Featherboard panels are available with Level, Concave or Convex Top options.

Convex Featherboard Panels

Excellent service from order to delivery. Particularly impressed with fence panels which I previously ordered over 20 years ago - to find it identical in terms of quality is amazing!!

Edward Fernandes, August 2025

Vertical Tongue & Groove Effect Panels

Our Vertical Tongue and Groove Effect panels are a mainstay of our premium panels range and are available with a Level or Convex Top.

They feature a mortice and tenon jointed frame for extra strength while the infill is constructed using Vertical Tongue and Groove Effect boards, which incidentally match the infill used on our Courtyard Gates, see pages 102 - 107.

The centre of the panel is given additional support with one 70mm wide rail for heights up to 1.22m, and two rails for heights of 1.52m and above. Panels are 1.83m wide, available in five heights from 0.91m to 1.83m with the option to use a panel width cut-down kit if required. Top and bottom rails are 70mm x 51mm planed with sides of 45mm x 51mm. Standard Tongue and Groove Effect panels have 21 pales.

Tongue and Groove Effect panels are designed for use with our slotted Jakposts, see pages 46 - 47, and manufactured from superior quality planed finish Jakcure® treated softwood, guaranteed for 25 years. Stainless steel fixings are used throughout for longer life. For matching Brook/Brabourne garden gates please see page 70.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground.

**The chunky Diamond Trellis is only for use as a topper panel on Convex Tongue and Groove Effect panels (sold separately). The trellis measures 1.83m wide x 300mm high, with a planed all round finish.

Did You Know:

There is no need to apply any further timber protection treatment to your Jacksons Jakcure® treated product. Some customers might want to add colour to their Jacksons products. In these cases, please be aware that timber will naturally take a while to dry, during which, natural shrinkage can occur, so we recommend that you don't apply any colour coatings until the timber is fully dry and stable.

Vertical Tongue & Groove Level Top

Vertical Tongue & Groove Convex Top

To see our latest prices, view our Tongue and Groove on our website by scanning the codes above.

Horizontal Tongue & Groove Effect Panels

Horizontal Tongue and Groove Effect panels are similar to their vertical counterpart panels making them a staple within our range, but the boards run horizontally and are only available with a Level Top.

Panels shown with optional capping rails

They feature a mortice and tenon jointed frame for extra strength while the infill is constructed using horizontal Tongue and Groove Effect boards. The centre of the panel is given additional support with one 70mm wide rail for heights up to 1.22m, and two rails for heights of 1.52m and above.

Panels shown with additional Diamond Trellis

Panels are 1.83m wide, with heights of 0.91m to 1.83m. Supporting rails are 45mm x 51mm and sides are 70mm x 51mm. Panels are available in five heights from 0.91m to 1.83m x 1.83mm wide with the option to use a panel width cut-down kit if required. Horizontal Tongue and Groove Effect panels have 21 pales.

Horizontal Tongue and Groove Effect panels are designed for use with our slotted Jakposts, see pages 46 - 47 and manufactured from superior quality, planed finish Jakcure® treated softwood, guaranteed for 25 years. Stainless steel fixings are used throughout for longer life. For matching garden gates please see page 72.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, and any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

Railing Toppers

Designed to fit on top of our premium framed panels, Railing Toppers add a touch of elegance and extra security to your garden.

Available in three styles; Level, Concave and Convex Top, the durable galvanised and powder coated steel panels feature finials and collars to alternate pales. Alongside added security, the other benefit of the slender metal topper panel is the extra light it offers, important if your garden suffers from lack of sunlight.

Like all of our panels, Railing Toppers slot easily into our sturdy Jakposts - see pages 46 - 47. All toppers are 1.83m wide. The Level Top panel is 450mm high. The Concave panel is 315mm at its lowest point, 450mm at the sides. The Convex panel is 585mm at the highest point and 450mm at the sides.

The top rail is constructed using 50mm x 6mm flat bar with 12mm vertical pales, while the bottom and side rails are of 50mm x 25mm steel box section, drilled with 6mm holes for fixing to the posts and fence top rail/wall for added rigidity and to prevent removal.

Manufactured from galvanised steel for extra long life and a 25 year service life guarantee. Polyester powder coated black as standard with a range of other colours available at additional cost.

■ Check for availability

Excellent, professional service throughout. Highest quality product delivered and unloaded with care. Unlike most other suppliers, high quality hinges and handles are included. The best customer experience I have had in years. Definitely the “go to” company for all fencing, gates and garden requirements.

JS, March 2025

To see our latest prices, view our Railing Toppers page on our website by scanning the QR code.

Hit & Miss Panels

Hit and Miss panels are so called because the boards are alternately fixed on the front and the back of the panel with an over-lap to create a stylish Hit and Miss pattern.

Horizontal panels with optional capping rails

They are part of our premium ‘good-both-sides’ range so that both you and your neighbour have the best looking side of the fence, as both sides are the same. Hit and Miss panels are available with the boards running horizontally or vertically (please note that it is just about possible to see through the panels at certain angles).

Whichever contemporary style you choose, improved wind resistance is a bonus, as air can pass through the gaps.

Panels are 1.83m wide with a 45mm x 51mm frame planed. The spacing of boards varies slightly on different height horizontal Hit and Miss - for ease of alignment, we recommend vertical style panels are used when different heights are used in a run.

Our Hit and Miss panels are available in four heights, all at 1.83m wide and they are designed for use with our slotted Jakposts, see pages 46 - 47, and manufactured from quality, planed finish Jakcure® treated softwood, guaranteed for 25 years. We also use stainless steel fixings throughout for longer life. For matching gates please see page 71.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, and any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

If you have to cut down a panel on site then use the following kit reference for all panel sizes.

Louvre Panels

Jacksons Louvre panels offer the sleek good looks suited to contemporary gardens. The horizontal slats are made from planed and shaped Jakcure® treated timber, secured to create an angle reminiscent of louvre blinds and filter air through the panel while providing privacy.

Panels shown with optional capping rails

Rear view of Louvre panels

The slats are also larger which gives greater privacy than Venetian - yet they still let in more light than solid styles like Chilham or Tongue and Groove Effect panels.

Oblique view of Louvre panels

Really helpful website and easy to order. The fence was delivered quickly and the quality is excellent. The products look great and we have had many compliments from all our neighbours!

Nicola Beaney, August 2023

Louvre panels are designed for use with our slotted Jakposts, see pages 46 - 47, and manufactured from superior quality, planed finish Jakcure® treated softwood, guaranteed for 25 years.

Stainless steel fixings are used throughout for longer life. Four panel heights available, all at 1.83m wide. For garden gate options please see pages 68 - 75.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, and any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

The panels can be cut to width on site with the original side batten being re-used in the new position.

Venetian Panels

One of our most popular styles and a favourite of garden designers. The strikingly attractive Venetian panel is another panel ideal for creating a dramatic light and shade effect in your garden as it allows light to pass between its horizontal slats.

Panels shown with optional capping rails

These slatted panels create a contemporary fence that is less imposing than solid panels, making gardens feel larger. They are designed for use with our slotted Jakposts, see pages 46 - 47, and manufactured from superior quality, planed finish Jakcure® treated softwood.

We also use stainless steel fixings throughout for longer life. Six panel heights are available, all at 1.83m wide. A panel width cut-down kit is also available. Spacing between pales - 15mm.

For matching gates please see page 73.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, and any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

Excellent products - their posts really are rot resistant - I have a number which have been in the ground over 20 years with no sign of problems, where cheaper products have sometimes rotted in as little as four years.

Peter Riley, August 2023

To see our latest prices, view our Venetian fence panels on our website by scanning the QR code.

Venetian Hit & Miss Panels

Just like our original Venetian panel, the frameless Venetian Hit and Miss panel retains a contemporary and sleek look that complements both modern and traditional gardens. We recommend adding capping rails to complete the look.

Here our Venetian Hit & Miss are installed with two 0.907m panels stacked to create a 1.807m high panel

Venetian Hit and Miss panels are part of our ‘good-both-sides’ range and feature horizontal slats on both sides of the panel with an over-lap which means air and light can

Constructed using 45mm x 16mm horizontal slats with a gap between the slats of approximately 30mm (which is larger than standard Venetian).

Venetian Hit and Miss panels are designed for use with our slotted Jakposts, see pages 46 - 47, and manufactured from superior quality, planed finish Jakcure® treated softwood, guaranteed for 25 years. Stainless steel fixings are used throughout for longer life.

The additional slats required to make these panels ‘good-both-sides’, also makes them quite heavy, so for ease of handling we offer them in two heights both at 1.83m wide. You can also cut panel widths on site using the specified cut down kit below. To achieve a taller fence, the panels can be stacked - for example stacking two 0.907m panels will give you 1.81m high.

We recommend using capping rails to add the finishing touch to these frameless panels. For matching garden gates please see page 72.

Please note: badges must be installed on same side to ensure alignment of pales both sides.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, and any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

Did You Know:

There is no need to apply any further timber protection treatment to your Jacksons’ Jakcure® treated product. Some customers might want to add colour to their Jacksons products. In these cases, please be aware that timber will naturally take a while to dry, during which, natural shrinkage can occur, so we recommend that you don’t apply any colour coatings until the timber is fully dry and stable.

To see our latest prices, view our Venetian fence panels on our website by scanning the QR code.

Aran® Panels

The Aran® panel is one of our ‘good-both-sides’ designs and features slats of different widths, intertwined to create a unique and attractive traditional style.

Panels shown with optional capping rails

The interwoven design not only creates subtle light and shade effects in your garden but also means that both you and your neighbour benefit from the best looking side of the fence with almost as much privacy as you would expect from a solid panel.

Aran® panels are designed for use with our slotted Jakposts, see pages 46 - 47, and manufactured from superior quality, planed finish Jakcure® treated softwood, guaranteed for 25 years.

Stainless steel fixings are used throughout for longer life. Available as a 1.83m high by 1.83m wide panel. Our Woven gates complement this panel (page 73).

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, and any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

Jacksons’ quality and service speaks volumes. Knowledgeable and friendly, from sales right through to their own delivery drivers too. Great customer care from start to finish.

Stewart Graham, August 2023

To see our latest prices, view our Aran® fence panels on our website by scanning the QR code.

Metro® Panels

Metro® was designed to make gardens feel longer - a modern take on our Venetian panels, posts are installed behind panels to create a continuous look, offering a sleek, slatted fence that is less imposing than a solid design.

Panels shown with recommended capping rails

Metro® is a semi-solid decorative panel, ideal for creating a lighter garden where privacy is not an issue. This panel has been designed with an urban motif in mind, featuring singular pales, similar to our Venetian panels.

91mm x 91mm square posts

Did You Know:

There is no need to apply any further timber protection treatment to your Jacksons Jakcure® treated product. Some customers might want to add colour to their Jacksons products. In these cases, please be aware that timber will naturally take a while to dry, during which, natural shrinkage can occur, so we recommend that you don't apply any colour coatings until the timber is fully dry and stable.

To see our latest prices, view our Venetian Metro® fence panels on our website by scanning the QR code.

The key difference is that the fence posts are less visible, meaning that, when installed, the panel will appear as continuous slats, rather than a run of individual panels.

This style of panel has been designed to make gardens appear longer. Nevertheless, this panel has the ability to modernise and blend into country gardens with its contemporary design.

Constructed from Jakcure® treated softwood, the Metro® panels use our 91mm x 91mm square planed posts with stainless steel nails used throughout for longer life. Constructed using 45mm x 16mm horizontal slats with a gap between the slats of approximately 30mm (which is larger than standard Venetian).

Please note: Venetian gates complement this panel (see page 73), although Venetian has 15mm spacing and these panels have 30mm spacing.

Gravel boards need to be used when panels are in contact with the ground as part of the 25 year Jakcure® guarantee conditions. This panel uses a unique gravel board (see below).

0.907m high - 12 pales 45mm x 16mm (Venetian section).
0.607m high - 8 pales 45mm x 16mm 1.82m wide.
2 no. vertical battens 45mm x 34mm, 2 no. 45mm x 16mm.

Please ask for advice when installing panels into a corner as internal battens will be required.

Chilham Panels

It's a challenge to design a solid timber fence that looks equally 'good on both sides'. However, our Chilham panels manage just that, in a unique design, free from horizontal rails that could spoil either yours or your neighbour's view.

Our Chilham fencing presents an attractive 'panelled' appearance at home in a contemporary garden and due to its construction, is sturdy too. It looks equally at home in a traditional English cottage garden setting as it does in a sleek urban setting.

Chilham panels are designed for use with our slotted Jakposts, see pages 46 - 47, and manufactured from superior quality, planed finish Jakcure® treated softwood, guaranteed for 25 years.

Stainless steel fixings are used throughout for longer life. Four panel heights available, all at 1.83m wide and for matching gates see page 73.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, and any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

Woven Panels

Part of our ‘good-both-sides’ panels range, Woven is a modern and robust alternative to traditional hazel hurdles, offering timeless style with added strength and durability.

As with all Jacksons panels, they are constructed from Jakcure® pressure treated softwood and framed for use with slotted Jakposts, making them far stronger than traditional versions of this style of fencing.

Panels shown with optional capping rails

Woven panels feature substantial 38mm x 7mm planed pales that maintain the structural integrity of the panel which are then fitted into a strong frame.

Mid rails are less obtrusive by design, so you and your neighbours are both winners. Other benefits of our Woven panel is that it creates amazing dappled light and shade effects and, while it provides a high level of privacy, wind resistance is lowered due to air being able to pass through the spaces between the slats.

Woven panels are designed for use with our slotted Jakposts, see pages 46 - 47, and manufactured from superior quality, planed finish Jakcure® treated softwood, guaranteed for 25 years. Stainless steel fixings are used throughout the fencing for longer life.

Four panel heights available, all at 1.83m wide along with a panel width cut-down kit.

For matching gates please see page 73.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, and any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

Canterbury Combi Panels

These premium contemporary panels combine the style of two of Jacksons’ most popular products: horizontal Tongue and Groove, and our ever-popular Venetian, hand crafted from pressure treated timber and supplied with our 25 year Jakcure® guarantee.

Canterbury Combi lends a sleek, modern and linear look to any garden, with the added benefits of privacy and protection from the wind that some customers may prefer. Please note the slatted pale spacing is different on these panels when compared with a standard Venetian panel.

“
The fence panels from Jacksons are premium quality and worth the extra cost. Delivery was efficient and I am over the moon with the result. Definitely recommend!.
Steve Upson, March 2025

Canterbury Combi panels are designed for use with our slotted Jakposts, see pages 46 - 47, and manufactured from superior quality, planed finish Jakcure® treated softwood, guaranteed for 25 years and fitted with stainless steel fixings throughout for longer life.

Available panel size is 1.83m high x 1.83m wide along with a panel width cut-down kit.

For matching gates please see page 73.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, and any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

Urban® Panels

Combining wide and narrow timber pales, Urban® is a contemporary panel with a distinctive design, ideal for a variety of applications. Mortice and tenoned for extra strength, these panels are planed all round for a smooth finish, with stainless steel fixings throughout to ensure a long life.

Panels shown with optional capping rails and Mi-T® Posts

Built using our Hit and Miss pales combined with our Woven slats this panel has been designed to look good on both sides. Urban® can also be rotated so the pales run vertically and installed in the same way.

I absolutely love my fence! Lots of admiring comments and enquiries on where I bought the panels. The timber is top-quality, planed and every panel is literally mm perfect. Carefully packaged for delivery to avoid any damage in transit.

P Smithson, May 2023

Urban® panels are designed for use with slotted Jakposts, see pages 46 - 47, and manufactured from superior quality, planed finish Jakcure® treated softwood, guaranteed for 25 years.

Pale sizes are 95mm x 8mm and 38mm x 7mm.

Available panel size is 1.83m high x 1.83m wide along with a panel width cut-down kit. These panels can also be rotated so pales run vertically.

For matching gates please see page 72.

Please note: badges must be installed facing the same way to ensure alignment of pales on both sides.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, and any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

Shadowline® Panels

Built with architectural design in mind, our Shadowline® panel has a modern unique profile which provides a dynamic central shadow gap between each board, free of any visible fixings, to provide a seamless contemporary finish. These contemporary panels offer you the option to install a solid privacy style fence with no lines of sight through the panel which creates a clear shadow line between each board.

All panels shown with recommended capping rails

Our Shadowline® fence panel offers a modern and contemporary clad design, similar to Tongue and Groove, and is highly recommended for homeowners looking for something a bit different.

Shadowline® panels are constructed using ‘Z shaped’ 144mm x 26mm horizontal boards which overlap. Each panel is manufactured using 4x 70mm x 24mm back rails.

Our Shadowline® panels are designed for use with our slotted Jakposts, see pages 46 - 47, and manufactured from superior quality, planed finish Jakcure® treated softwood, guaranteed for 25 years. Stainless steel fixings are used throughout for longer life.

Our 0.66m high panels are made with 5 boards.
Our 0.91m high panels are made with 7 boards.
Panels are 1.83m wide.

To achieve a taller fence, the panels can be stacked - for example stacking 2x 0.91m panels will give you 1.8m high approx. You could use 2x 0.66m panels for a 1.3m high panel approx or alternatively combine one of each height for 1.55m. It is not obvious in any way that these panels are stacked and once installed they will appear as one continuous panel.

We recommend using capping rails to add the finishing touch to these frameless panels. For garden gate options please ask.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, and any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

Jaktop Panels

Our Jaktop panels and gates grace many front gardens in rural and suburban areas and offer a decorative alternative to palisade or picket style fencing.

The criss-cross pattern constructed using half round timber pales gives the panels a very distinctive look while the addition of sturdy rails and vertical end pales create a fixed panel suitable for use with slotted Jakposts, see pages 46 - 47.

Additionally, Jaktop panels need to be mounted a minimum clear of the ground. Stainless steel fixings are used throughout for longer life.

Available in two heights at 1.83m wide. Jaktop panels can be cut to width on site, with the original side batten re-used.

For matching gates please see page 74.

Please note: this product can be installed without the use of gravel boards providing there is at least a 50mm ground clearance and/ or the item remains unaffected by any debris. However to meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground - pages 50 - 51. Any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

Palisade Panels

Palisade is a classic and enduring style of garden fencing that is also known as picket fencing and is available with pointed or rounded pales. We supply timber palisade fencing in both panels and kit-form.

Palisade panels are designed for use with our slotted Jakposts, see pages 46 - 47 and manufactured from superior quality, planed finish Jakcure® treated softwood, guaranteed for 25 years and complete with stainless steel fixings throughout for longer life.

“
As a previous customer and now as a registered installer of their fencing, I can honestly say that we are full converts to their far superior products, there is simply no better fencing and the service is equally good.
Andy @ Bowood, Approved Installer

For matching gates please see page 74.

To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, alternatively panels can be installed 50mm clear of the ground. Any timber cut on site must be treated with Cut Treatment Preservative, see page 53.

All panels are 1.83m wide. Pales are 22mm x 75mm nominal section planed to finish at 19mm thick. Pale tops are machined. Each panel is backed by two substantial rails which have been fully planed.

Palisade Level Top Panels (1.83m wide)

Rounded Tops		Pointed Tops	
Height	Ref	Height	Ref
1.00m	223500 ●	1.00m	224500 ■
1.20m	223600 ●	1.20m	224600 ○

Panels can be cut to width on site without the need for a cut width kit. Always use Cut Treatment Preservative on cut timber, see page 53.

Traditional Palisade or Picket Fencing

Traditional Palisade fencing is also known as picket fencing. ‘Traditional’ fencing is a term we use to describe a system of fencing made from vertical posts and horizontal rails, with pales fixed to the rails, supplied in kit form rather than panel form.

Pales are nominal 75mm x 22mm section, (70mm x 19mm planed finished size) planed with pointed or rounded tops with pale tops machined. When calculating materials required, you will need one post for every 2.28m plus one extra for the end of the run. There are 14 pales per bay. Each bay is backed by two 2ex 87 x 38mm nominal rails.

Pointed top pales

The fence should be erected 50mm above ground level to allow for weeding, and to keep it clear of the ground.

Posts for 1.00m and 1.20m high fences are of a nominal 100mm x 75mm section and have two mortices with tops weathered two ways or rounded. Posts for 1.80m fences are of a nominal 125mm x 75mm section and have three mortices with tops weathered two ways or rounded. Corner posts measure a nominal 100mm x 100mm in section. Use two rails per bay for 1.00m and 1.20m high fences and three per bay for 1.80m high fences.

Manufactured from superior quality planed finish Jakcure® treated softwood, guaranteed for 25 years. All fittings and fixings are stainless steel. For matching gates see the gates section - page 74. To meet the conditions of the 25 year Jakcure® guarantee, gravel boards are required where panels are in contact with the ground, see pages 50 - 51, alternatively pales can be installed 50mm clear of the ground. Any timber cut on site must be treated with Cut Treatment Preservative, see page 53.
