

The Curve

The Curve is a sleek and simple structure - one continuous curve, that arches gracefully from the ground. There's no need for posts with this seemingly gravity defying contemporary garden shelter. It is fastened securely to the ground with three strong steel blades that are dug in at the corner and mid points on each side.

The generous interior space is big enough to set up a dining area, leaving ample room for a chill out zone. This is enhanced by the unusual effects produced by sunlight shining through the horizontal slats, which creates a calming setting for relaxing in.

Can you picture illuminating the shape of the curves at night with LED lighting strips to create a memorable dramatic effect. The possibilities of how to use this unique outdoor space are endless.

It is shown here as a stand alone structure, open at the front and the back. It could be installed up against a wall, giving it a more enclosed feel. Alternatively it could be positioned over French windows leading out on to your patio or deck, providing a chic indoors/outdoors area between the house and garden.

The clear polycarbonate sheets covering the panels, lend the Curve a shower-proof quality, and this also adds some protection from the wind.

The Curve

Dimensions: approx 5.4m wide x 3.1m deep x 2.2m high. The timber components of the Curve are made from Jakcured pressure treated timber guaranteed for 25 years.

The Demi Curve

Beautiful in all the same ways as the Curve, the Demi Curve is smaller, but still perfectly formed.

It is effectively half the size width ways of the full Curve. Comprising two curved panels joined side by side that are supported by sturdy posts on the front corners. These posts are dug in and it is also fastened securely to the ground with strong steel blades that are dug in at the back corners and the mid point along the rear.

The Demi Curve is perfect for a courtyard or the smaller urban garden, although it is still large enough to house a comfortably sized seating set and table, just right for relaxing in. Alternatively with a larger table and chairs it will make a delightful al fresco dining area.

The Demi Curve also has polycarbonate sheets covering the panels to give you some protection from showers and the wind.

Demi Curve

Dimensions: approx 3.1m wide x 2.7m deep x 2.2m high).

Venetian Retreat

Designed using Jacksons popular Venetian panels for the sides and roof. The Retreat Shelter is a unique garden structure that will create a delightful 'retreat' in any garden.

The Venetian panels give the shelter an attractive contemporary look and when the sun is shining casts dramatic patterns of light and shade.

The standard Retreat is a single unit version, as shown here. If desired an extra panel can be added at the open side. Wider versions of the Retreat can be achieved by adding intermediate posts and Venetian panels.

The Retreat is available with or without a polycarbonate roof covering. The polycarbonate panel sits on top of the Venetian roof panels and the rear edges protruding over the rear fascia to allow rain water to run off, with the polycarbonate box section channels running in line with the pales, across the roof. (Please note if you select the polycarbonate roof option the roof sheet may be delivered separately from the main timber delivery).

Specifications

Constructed from Jakcured softwood. Retreat is 2100mm high at the front, 2000mm high at the back.

1710mm from front post to rear post, (1923mm including roof overhang).

3325mm wide. We advise always digging the posts 600mm in the ground.
