

Landscape Timbers- Jakwall and Sleepers

Jakwall is a distinctive grooved, brick effect landscape timber system, unique to Jacksons. It can be used to create retaining walls ideal for raised borders, fish ponds, play areas, sand pits and fascia borders.

It comes in three options; the first with a 90mm grooved face towards the front, ideal for creating retaining walls or raised flower beds. A further option is to have the timbers grooved all round, so every face shows the brick effect grooves.

Another option is to have the 140mm grooved face to the front, this larger "brick" effect front is more suitable for creating a wall or fence by building single timbers up on top of each other to create any height wall/fence that you require.

All timber used throughout is superior quality, planed Jakcured softwood guaranteed for 25 years.

Jakwall is an economical system that can work out considerably cheaper than traditional bricks and mortar. It has a simple and easy installation method using timber screws that fix the timbers together without the need for pre-drilling. available in two lengths. Always use Jakcure End Grain Treatment on cut timber, see page 45.

Grooved Jakwall

Size

	Ref
2.35m x 140mm x 90mm grooved on 90mm face	171700 ■
2.35m x 140mm x 90mm grooved on 140mm face	171800 ●
2.35m x 140mm x 90mm grooved all round	171900 ■
2.35m x 140mm x 90mm not grooved	171910 ●

Ungrooved Jakwall has been introduced after some of our customers asked us for us to supply it. They loved the Jakwall landscape timber system, but preferred the timber to be ungrooved.

Ungrooved Jakwall timbers ungrooved on all faces.
