

# Wheelie Bin Stores

The bin store is made from Jakcured softwood tongue and groove effect boards, and has an internal galvanized steel frame for extra strength. It is designed for two wheelie bins, with hinged doors at the front and hinged lids which open upwards to allow access to the bins, whilst they are inside the store. Each lid has a chain which can be attached to the wheelie bin lid, so as the store lid is lifted it automatically raises the bin lid as well. An additional optional cabin hook is available to attach to the bin store and lid to hold the lid in a secure open position. All timber used throughout is superior quality Jakcured softwood, planed all round and guaranteed for 25 years. Fixings are stainless steel or hot dip galvanized.

Across the country there seem to be so many variations of recycling and household waste wheelie bins. They vary in size, shape and colour, and nowadays there are an array of recycling boxes to add to the mix. So to help cater for as many different bins as possible, we have created an additional section that can be added to our standard double bin store, with an optional shelf or two! This new extra section with a slatted shelf is ideal for your recycling boxes.

## Specifications

Wheelie bin store comes as flat packed panels that require self-assembly, instructions and fixings are included.
