

Venetian Retreat

Designed using our popular handcrafted Venetian panels for the sides and roof, the Venetian Retreat Shelter is a unique garden structure that will create a delightful 'retreat' in any garden.

The Venetian panels give the shelter an attractive contemporary design and, when the sun is shining, casts dramatic patterns of light and shade.

The standard Retreat is a single unit version, as shown here. If desired, an extra panel can be added at the open side. Wider versions of the Retreat can be achieved by adding a third bay (one panel).

The Retreat is available with or without a polycarbonate roof covering. The polycarbonate panel sits on top of the Venetian roof panels and the rear edges, protruding over the rear fascia to allow rain water to run off, with the polycarbonate box section channels running in line with the pales, across the roof. (Please note if you select the polycarbonate roof option the roof sheet may be delivered separately from the main timber delivery and can only be delivered in the mainland UK).

Specifications

Constructed from Jakcure® softwood. Retreat is 2100mm high at the front, 2000mm high at the back. 1710mm from front post to rear post, (1923mm including roof overhang). 3325mm wide. We advise always digging the posts 600mm in the ground. Instructions for installation of most of our products are available from our website. Alternatively we can send you a hard copy. Please enquire with our sales team

Woven Retreat

Designed using Jacksons popular Woven panels for the sides and roof. The Woven Retreat Garden Shelter is a unique garden structure that will create a delightful 'retreat' in any garden.

The Woven Retreat shown here is the standard single unit version. If desired an extra panel can be added at the open side (extra panel not included). The Woven Retreat shelter is available with or without a polycarbonate roof sheeting. The polycarbonate panel sits on top of the Woven roof panels and the rear edges, protruding over the rear fascia to allow rain water to run off, with the polycarbonate box section channels running in line with the pales, across the roof. (Please note if you select the polycarbonate roof option the roof sheet may be delivered separately from the main timber delivery and can only be delivered in the mainland UK).

The shelter is constructed from Jakcure® treated softwood, planed all round and guaranteed for 25 years. Fixings are stainless steel or hot dip galvanized. It is 2100mm high at the front and 2000mm high at the back. 1710mm from front post to rear post, (1923mm including roof overhang) 3325mm wide. We advise always digging the posts 600mm in the ground.

Instructions for installation of most of our products are available from our website. Alternatively we can send you a hard copy. Please enquire with our sales team.

Wheelie Bin Stores

The Bin Store is made from Jakcure® softwood Tongue and Groove Effect boards and has an internal galvanized steel frame for extra strength. It is designed for two wheelie bins, with hinged doors at the front hinged lids which open upwards to allow access to the bins. Each lid has a chain which can be attached to the wheelie bin lid, so as the store lid is lifted it automatically raises the bin lid as well. An additional optional cabin hook is available to attach to the bin store and lid to hold the lid in a secure open position. All timber used throughout is superior quality Jakcure® treated softwood, planed all round and guaranteed for 25 years. Fixings are stainless steel or hot dip galvanized.

Across the country there are so many variations of recycling and household waste wheelie bins. They vary in size, shape and colour, and nowadays there are an array of recycling boxes to add to the mix. To help cater for as many different bins as possible, we have created an additional section that can be added to our standard double bin store, with an optional shelf. This new extra section with a slatted shelf is ideal for your recycling boxes or alternative goods you wish to store in the garden. Instructions for installation of our products are available from our website. Alternatively we can send you a hard copy. Please enquire with our sales team

Specifications

Wheelie Bin store comes as flat packed panels that require self-assembly, instructions and fixings are included.

Double Bin Store Dimensions:

outside: 1200mm high x 950mm deep x 1500mm wide
inside: 1120mm high x 800mm deep x 1350mm wide

Bin Store with Additional Unit Dimensions:

outside: 1200mm high x 950mm deep x 750mm wide
inside: 1120mm high x 800mm deep x 680mm wide

Please note: you can only use the shelf in an additional unit, not the main double store.

Sissinghurst Planters

These beautifully designed planters will add a touch of class to any corner of your garden. Available in two sizes, the planters are produced from strong 25mm thick x 100mm heavy duty Tongue and Groove boards made from Jakcure® treated softwood timber.

The L formation corners are produced from 95 x 22mm boards and the base consists of 95 x 22mm slats with small drainage gaps. These sit approximately 80mm off the ground, on 38 x 19mm battens.

Jacksons Fencing products and planters are renowned for their quality and sturdiness, this does mean that these planters are rather heavy, especially when they are filled, so you may require assistance when moving and we recommend they are moved into position whilst empty. The planters are already assembled.

All timber used throughout is superior quality Jakcure® treated softwood, planed all round and guaranteed for 25 years. Fixings are stainless steel or hot dip galvanised.

Specification

The internal dimensions of the planters are 440 x 440mm for the smaller square planters (753200) and 440 x 900mm for the larger long planter (753201). Both styles of wooden planter have a depth of 380mm internally.
