### When does the guarantee start?

The guarantee applies to the original purchaser only or above postcode and is non-transferable unless agreed in writing, and starts from the date when the product was delivered to site.

### What does the guarantee cover?

The 25 Year Service Life Guarantee covers all steel manufactured products and Polyester Powder Coated products against faulty coatings or manufacture, provided they have been installed, used and maintained in accordance with our instructions, and protects you against failures in the products caused by manufacturing defects that may have occurred when the product was made.

We'll cover you for any defects in material or workmanship that occur as a result of the manufacturing process (with exclusions).

In this way, we accept responsibility for those items and components that are ours; but naturally we cannot cover items from specialist suppliers attached to our products. including but not limited to some wire products, locks and locking devices, self-closing units, latches, padlocks, rollers, bearings and most motion devices which are covered for one year, and Automation Equipment which is covered by a 25 month guarantee subject to validation. Other exclusions may apply.

### What doesn't the guarantee cover?

Remember that the purpose of any warranty is only to cover defects that may have arisen during the manufacturing process. Therefore, we cannot accept responsibility for or cover problems arising from:

- Incorrect fitting or installation of the product in contravention of H S Jackson & Son (Fencing) Limited fixing and maintenance instructions available at the time of purchase.
- Misuse and neglect of the product including but not limited to poor maintenance and care of the product. We advise regular and appropriate cleaning of surfaces to keep them free of dirt or corrosive matter and lubrication of moving parts throughout the duration of this guarantee.
- Unauthorised modification of the product, wilfully or accidentally damaged, we accept no responsibility for failure.
- Where the product has been cut, drilled or the substrate exposed to the elements during installation, the steel should be treated immediately with a good quality zinc rich coating or the guarantee on that component or part of the product will be excluded.
- Installation or use of the product within 500 metres of the sea or an estuary or in conditions where salt or other corrosive particles are in the environment unless a) the operating conditions have been declared to us in advance and/or b) all metal parts of the product have been galvanised to BS EN 1461 and further coated with Jacksons Marine Coat.
- Normal 'wear and tear' on products in use.
- External events including environmental issues such as storms and floods, accidental damage, salt corrosion, civil unrest, forced entry or vandalism.

If a replacement is offered but identical goods are no longer available, we will replace it with our nearest current equivalent product.
